

Vzpomínka (48) Wabash County, Indiana, USA

Vabašský okres - Indiana

Okres ve střední části severní Indiany.

Sídlo okresu město Wabash.

Na tomto území žila řada národností - původně indianští obyvatelé, poté francouzští obchodníci, dále Američané.

Koupě území se uskutečnila v roce 1818, od dva roky v později se vytvořilo celistvé území.

Název Wabash měl tuto genezi: indianský název Wabashike (čistě bílý), poté francouzská odvozenina Ouabache (též název řeky) a anglický ekvivalent Wabash.

Historic Wabash County

The name Wabash is derived from the Native Miami waapaahsiki siipiiwi which means "it is a bright white river." The City of Wabash and Wabash County were named after the river.

The source of the Wabash River is near Fort Recovery, Ohio and the river flows north, then west before it turns south to the Ohio River. The Native Miamis lent more than a name to the area. Wabash County is rich in their culture. Share in Miami lore by visiting the Wabash County Historical Museum and the Wabash Carnegie Library. You may want to read the story of Frances Slocum, who, as a young white girl, was kidnapped by Native Americans in Pennsylvania and found here by her family more than 50 years later. Along with other family members, she is buried in southwest Wabash County in the Cemetery that bears her name. You may want to visit the grounds of the Treaty of Paradise Spring in downtown Wabash and trek along the river on the Paradise Spring Riverwalk.

Wabash/Erie Canal Kerr Lock at Lago

No historical perspective of Wabash County would be complete without a discussion of the Wabash/Erie Canal. In the 1780s travel conditions were harsh due to the

tremendous old growth forests of the Midwest. Early settlers speculated on a better way of traveling between the Great Lakes and the Gulf of Mexico. It would be another 70 years before the Canal was a reality but by the early 1840s, traffic was moving.

The Canal was built largely by Irish immigrants and their influence can be seen at the town of Lago in Wabash County. Visit St. Patrick's Catholic Church, one of the Midwest's earliest churches. While in Lago, stop at Kerr Lock, one of the last surviving locks of the Wabash/Erie Canal.

Wabash County owes much of its early success to the Canal. Trading in leathers, cheeses, grains, pork, and whiskey helped build a thriving community for settlement.

The City of Wabash was the first electrically lighted city in the world. See one of the original lights in the lobby of the historic Wabash County Courthouse.

North Manchester, in northern Wabash County, is the birthplace of Vice President Thomas Marshall and home to Manchester College, founded in the 19th century. Visit the historic covered bridge while in North Manchester or the covered bridge of Roann, just a few minutes away.

A walk in one of Wabash County's forests will take you back to a time when old growth forest covered the area. Pristine examples of this forest are still growing here and may be viewed year round.

The State Forests that surround the reservoirs provide wildlife observation areas and wetland preserves. Bring your camera as you observe deer, waterfowl, and other natural delights.

The Honeywell Pool in Wabash is open to the public during summer months and the North Manchester Pool is open year round.
